

# The sun is shining on energy efficiency

**Our province continues to be a national leader in fighting climate change, and this new program will build on our successes.**

- Energy and Mines Minister  
Derek Mombourquette

**efficiency**  
NOVA SCOTIA

**M**ore Nova Scotians than ever are switching to solar, with help from Efficiency Nova Scotia.

Homeowners like Dennis Wright, whose Beechville home has been in his family for more than three decades, are now enjoying significant energy savings and reduced carbon outputs.

Making the switch to solar has saved Nova Scotians over 400,000 kWh, continuing our province's dedication to fighting climate change, while creating economic and environmental benefits for all Nova Scotians.

Now that's a reason to shine.
